

THINK BEFORE YOU PARK

**BE CONSIDERATE TO OUR NEIGHBOURS
YOU COULD ENDANGER A CHILD'S LIFE**

Thank you to the parents and carers who are supporting us with the parking issues we have outside of school.

We need to remind some parents that **parking on the pavement, blocking neighbours driveways and double parking is illegal** and can result in fines from the local police.

Our local PSCO's are aware of the issues outside of school and will be working to support us in ensuring the roads outside our school are safe for everyone.

Please help us keep everyone safe and be considerate of our neighbours when parking near school.

Who to contact in school:

If you wish to discuss anything about your child, please contact the following people:

1st point of call—your child's class teacher

2nd point of call—Your child's phase leader:

Early Years (Nursery and Reception)— Mrs Hargreaves

Years 1, 2 and 3 —Miss O'Gorman

Year 4, 5 and 6—Ms Stock

SEND provision - Mrs Yasmeen

Family Support and Attendance — Miss Carpenter

ZERO TOLERANCE

We operate a zero tolerance, both physical and verbal towards any of our colleagues or pupils.

Any visitor found in breach of this policy will be asked to leave immediately.

Please respect our colleagues at all times.

Online Safety

Snapchat

SnapChat is an app that is for people over the age of 13 years of age. No one in our school should be

using it. We have become aware that some of our pupils have access to SnapChat when at home and this is causing issues in school. Please ensure you are aware of what your child is accessing online and ensure it is age appropriate and that they are staying safe online. Below is an advice poster from the National College to support Parents and Carers in understanding SnapChat.

What Parents & Carers Need to Know about

SNAPCHAT

AGE RESTRICTION
13+

Snapchat is an instant messaging app which allows users to send images, videos and texts to people in their friends list. One of Snapchat's unique features is that pictures and messages 'disappear' 24 hours after they've been viewed; however, this content isn't as temporary as many believe - with some users saving screenshots or using another device to take a photo of their screen. This year, Snapchat added 'My AI': a customisable chatbot with which people can chat and share secrets, as well as asking for advice and suggestions of places to visit.

WHAT ARE THE RISKS?

CONNECTING WITH STRANGERS

Even if your child only connects with people they know, they may still get friend requests from strangers. The Quick Add option lets users befriend people the app recommends - but these 'friends' are merely a username, which could have anyone behind it. Accepting such requests reveals children's personal information through the Story, SnapMap and Spotlight features, potentially putting them at risk from predators.

EXCESSIVE USE

Snapchat works hard on user engagement, with features like streaks (messaging the same person every day to build up a high score). Spotlight Challenges tempt users into spending time producing content in search of cash prizes and online fame, while it's easy for children to pass hours watching Spotlight's endless scroll of videos.

INAPPROPRIATE CONTENT

Some videos and posts on Snapchat aren't suitable for children. The hashtags used to group content are determined by the poster, so even an innocent search term could still yield age-inappropriate results. The app's 'disappearing messages' feature also makes it easy for young people (teens in particular) to share explicit images on impulse - so sexting continues to be a risk associated with Snapchat.

ARTIFICIAL INTELLIGENCE

My AI is Snapchat's new chatbot, which replies to questions in a human-like manner. However, the software is still in its infancy and has significant drawbacks, such as biased, incorrect or misleading responses. There have already been numerous reports of young users turning to AI for medical help and diagnoses, which could be inaccurate and therefore potentially dangerous.

ONLINE PRESSURES

Although many of Snapchat's filters are designed to entertain or amuse, the 'beautify' effects on photos can set unrealistic body-image expectations - creating feelings of inadequacy if a young person compares themselves unfavourably with other users. Snapchat now also has 'priority' notifications (which still get displayed even if a device is in 'do not disturb' mode), increasing the pressure on users to log back in and interact.

VISIBLE LOCATION

Snap Map highlights a device's exact position on a virtual map which is visible to other users. There are options to restrict who can see this information: all friends, only you (Ghost Mode) or selected friends. Snapchat also has real-time location sharing, which is intended as a buddy system to ensure friends have reached home safely - but which could also be used to track a young person for more sinister reasons.

Advice for Parents & Carers

TURN OFF QUICK ADD

The Quick Add feature helps people find each other on the app. This function works based on mutual friends or whether someone's number is in your child's contacts list. Explain to your child that this could potentially make their profile visible to strangers. We recommend that your child turns off Quick Add, which can be done in the settings (accessed via the cog icon).

CHOOSE GOOD CONNECTIONS

In 2021, Snapchat rolled out a new safety feature: users can now receive notifications reminding them of the importance of maintaining connections with people they actually know well, as opposed to strangers. This 'Friend Check Up' encourages users to delete connections with users that they rarely communicate with, to maintain their online safety and privacy.

DISCUSS AI

Although My AI's responses can often give the impression that it's a real person, it's essential that young people remember this certainly isn't the case. Encourage your child to think critically about My AI's replies to their questions: are they accurate and reliable? Remind them that My AI shouldn't replace chatting with their real friends, and that it's always better to talk to an actual person in relation to medical matters.

CHAT ABOUT CONTENT

It may feel like an awkward conversation (and one that young people can be reluctant to have) but it's important to talk openly and non-judgementally about sexting. Remind your child that once something's online, the creator loses control over where it ends up - and who else sees it. Likewise, it's vital that children understand that some challenges which become popular on the platform may have potentially harmful consequences.

KEEP ACCOUNTS PRIVATE

Profiles are private by default, but children may make them public to gain more followers. Snap Stories are visible to everyone your child adds, unless they change the settings. On SnapMaps, their location is visible unless Ghost Mode is enabled (again via settings). It's safest not to add people your child doesn't know in real life - especially since the addition of My Places, which allows other Snapchat users to see where your child regularly visits and checks in.

BE READY TO BLOCK AND REPORT

If a stranger does connect with your child on Snapchat and begins to make them feel uncomfortable through bullying, pressure to send explicit images or by sending sexual images to them, your child can select the three dots on that person's profile and report or block them. There are options to state why they're reporting that user (annoying or malicious messages, spam, or masquerading as someone else, for example).
